**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-4, 6, 8-12 and 17 allowed.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 18 rejected under 35 U.S.C. 103(a) as being unpatentable over Kalkhoran et al. (5,726,40) in view of Sadana et al. (6,259,137).

Regarding Claims 1, 3-5, 7-12 and 17, Kalkhoran et al. discloses a wavelength selective photodetector where in Fig. 1, silicon dioxide insulating layer 102 divides substrate 102 into layer 108 and 110. Insulating layer 102 extends throughout the substrate 106.

Kalkhoran et al. fail to disclose the required semiconductor buried oxide insulation thickness. However, Sadana et al. disclose a defect induced buried oxide for throughput SOI where in Fig. 3 and Claims 1, 6 and 15 the required buried oxide thickness is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required buried oxide thickness in Kalkhoran et al.

Art Unit: 2826

as taught by Sadana et al. in order to have a semiconductor structure with increased performance.
